

Total Readiness Excursion Model

A solid understanding of where to prioritize the investment of resources across an organization is critical to the mission and longevity. Our customers must be ready whenever needed. However, readiness is expensive to maintain and even more costly to get wrong. LMI's Total Readiness Excursion Model times the replacement of people and supplies optimally for any modeled scenario for all branches of service.

Quicker Decisions from Better Correlations

Complicated modeling does not speed decision-making. With LMI's Total Readiness Excursion Model, stakeholders easily drive the experience, simulating how a multitude of factors affect mission readiness, including different uses of resources (people, equipment, etc.). This powerful tool illuminates dependencies and relationships between installations.

Using the Total Readiness Excursion Model, you can do the following:

"This powerful tool illuminates dependencies and relationships between installations."

Simulate Demand. Understanding stress points is essential. This model creates a simulated environment, enabling customers to assess readiness for easy and difficult to predict events. The ability to predict events ahead of time reduces risk.

Ease of Use. Unlike most modeling tools, LMI's Total Readiness Excursion Model offers intuitive and easy-to-use interfaces so that stakeholders can assess the situation quickly and make informed decisions.

Simulate Resources. Waiting for parts, people, and resources to arrive can be highly detrimental to an organization, wasting time and money. This modeling program accounts for the dependencies and relationships between resources and helps customers invest selectively to ensure the success of the mission.

About Us

LMI is a consultancy dedicated to powering a future-ready, high-performing government, drawing from expertise in digital and analytic solutions, logistics, and management advisory services. We deliver integrated capabilities that incorporate emerging technologies and are tailored to customers' unique mission needs, backed by objective research and data analysis. Founded in 1961 to help the Department of Defense resolve complex logistics management challenges, LMI continues to enable growth and transformation, enhance operational readiness and resiliency, and ensure mission success for federal civilian and defense agencies.
