SMART AUDIO VIDEO INNOVATION

ABOUT SMART-AVI

Throughout its existence, Smart-AVI has been tailoring its products to address the needs of system integrators and individuals to transfer and share a variety of signals within specific system environments. SmartAVI specializes in professional audio and video integration technologies for the multi-user environment. Some of its products include video extenders, video switches, video splitters, USB extenders, DVI extenders, KVM solutions, video walls, matrixes, digital signage, computer-video interfaces, distribution amplifiers, fiber optic, infrared, and HDMI solutions.

Smart-AVI solutions are distinctive because of our experience in the computer industry. Our knowledge of software programming, engineering and advanced electronics combine to offer our customers flexible, user-friendly and unique technology solutions.

Many leading businesses have recognized the significance of Smart-AVI's solutions and have eagerly implemented them. Companies that have embraced Smart-AVI's expertise include: NASA, Boeing, DreamWorks Studios, Johnson & Johnson, United States Army, Procter & Gamble Company, Adobe Systems Incorporated, Bellagio Las Vegas, Lockheed Martin, Monte Carlo Resort and Casino, and Miller Brewing Company.

Smart-AVI, Inc. is a privately-held, internationally-recognized company operating out of the United States, with its headquarters located in Burbank, California.

EXTENDERS

Video Extenders, Audio Extenders, Audio Video over CAT5 and Video Distribution products that extend composite video, audio, IR control, WUXGA, DVI and HDMI for PC and MAC up to 1,699 feet from a host source with no loss of signal to remote devices using CAT5 and STP cables.

EXTENDERS

SPLITTERS

Expand your audience with the use of a video splitter. Route your data from a single source to multiple target destinations, allowing your presentation to be seen not in one place – but several at once. This is the perfect solution for routing audio, video and IR control over twisted pair.

SPLITTERS

SWITCHES

By using a video switch, you can route multiple sources (such as computers and/or DVD players) to multiple displays at will, taking full creative control of your presentations. Our video switches are perfect for WUXGA, XVGA, DVI, HDMI, SVGA, XGA, RGBHV and SOG signals and applications.

SWITCHES

FIBER

Our wide range of fiber optics digital extenders take VGA, DVI and HDMI signals and transfer them as binary coded data, not as analog signals. This prevents corruption of the signal over the transmission line. The transfer is done by either multimode or singlemode fiber optic cables.

FIBER

SIGNAGE & VIDEO WALL

Our digital signage and video wall products are designed to be easy to use yet powerful enough for even the most robust networks. Even novice users will have their digital signage project up and running in no time. Our video wall products deliver high definition video up 64 screens.

SIGNAGE & VIDEO WALL

ACCESSORIES

Where there are high-tech gadgets and products, there are accessories. Here, we have miscellaneous items that can help extend your signals, control your hardware and make your life easier.

HDC-IR Infrared Extender over CAT5

The HDC-IR allows for the remote control of up to three infrared devices from up to 3,000 feet away. Control several TV's, DVD Players and other infrared devices with only one remote control. Ideal for Hotels, Control rooms, Remote Cable TV control, Remote VCR control, Educational Media, Home use and more.

- Output reaches up to 3,000
- Sends IR and Power signals over CAT5
- Built-in lightning, power surge and transient protection
- High ground loop immunity
- Compact enclosure
- Fully compliant with standard modulated IR and the latest IRDA
- Fully transparent path for all protocols and data transfers
- Bi-directional IR

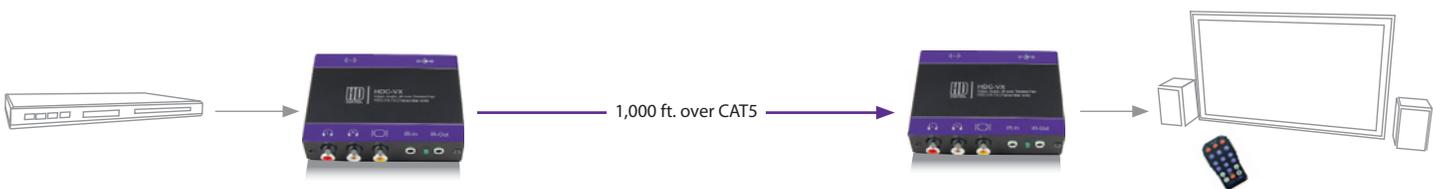

Model **Description**

HDC-IRS IR CAT5 Point to Point Extender. Includes:[HD-IR-TX, HDC-IR-RX, SM-LED, SM-EYE and [PS12VD1A]

HDC-VX Composite Video, Stereo Audio and Infrared Extender over CAT5

The HDC-VX allows for the extension of composite video, stereo audio and infrared control up to 1,000 feet away over CAT5 cable. Extend the output of TV's, DVD Players and other A/V devices with remote control. Ideal for Hotels, Control rooms, Remote Cable TV control, Remote VCR control, Educational Media, Home use and more.

- Output reaches up to 1,000 feet (300m)
- Supports PAL, NTSC and SECAM
- Video 100 MHz Bandwidth
- Video cable compensation (automatic)
- Compatible with line level stereo audio signals
- High ground loop immunity
- Built-in lightning, power surge and transient protection
- Remote units come with buffered outputs
- Compact enclosure
- Fully transparent path for all protocols and data transfers

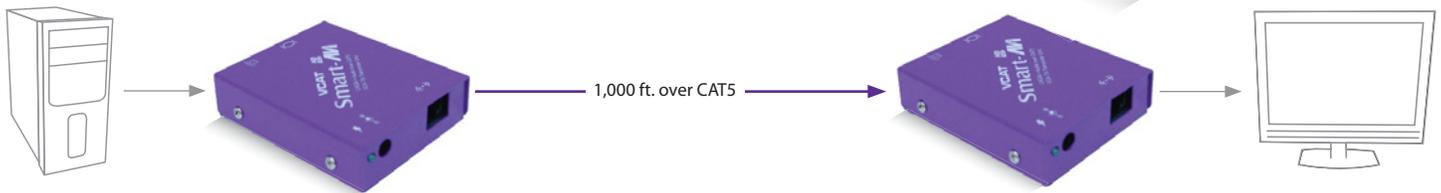

Model **Description**

HDC-VXS Video/Audio/IR CAT5 Point to Point Extender. Includes: [HVC-VX-RX, HDC-VX-TX,SM-LED, SM-EYE and 2X (PS5VD1A)]

VCT-100 UXGA Video Extender over CAT5

The VCT-100 is a high resolution UXGA (transmitter and receiver) designed to broadcast desktop video signals over unshielded twisted pair cabling (CAT5) up to 1,000 feet. Ideal for presentation environments that require a remote monitor or projector.

- Uses easy to install, inexpensive CAT5/5e/6/7/8
- Output reaches up to 1,000 feet (300m)
- Supports high resolution clear video up to 1920x1200
- 300 MHz Bandwidth
- Sends high-resolution UXGA and power signals over single CAT5
- Compatible with VGA, XGA, Sun, MAC and SGI signals
- Sync Format / Polarity Preservation
- Designated trimmer in the remote unit to compensate for cable length

VCA-100 UXGA Video and Mono Audio Extender over CAT5

The VCA-100 allows for the extension of UXGA video and mono audio up to 1,000 feet away over CAT5 STP cable. Ideal for presentation environments that require remote monitors, projectors and mono audio.

- Uses easy to install, inexpensive CAT5/5e/6/7/8
- Output reaches up to 1,000 feet (300m)
- Supports high resolution clear video up to 1920x1200
- 300 MHz Bandwidth
- Sends high-resolution UXGA and mono audio over single CAT5
- Compatible with Line Level Mono Audio Signals
- Compatible with VGA, XGA, Sun, MAC and SGI signals
- Sync Format / Polarity Preservation

XT-AV WUXGA Video and Stereo Audio Extender over CAT5

The XT-AV is a high resolution WUXGA and stereo audio extender over CAT5 up to 1,000 feet. Ideal for presentation environments that require remote monitors, projectors and stereo audio.

- Uses easy to install, inexpensive CAT5/5e/6/7/8
- Each Output reaches up to 1,000 feet (300 m)
- Supports high resolution video up to 1920x1200
- 300 MHz Bandwidth
- Sends high-resolution WUXGA and Stereo Audio
- Compatible with VGA, XGA, Sun, MAC and SGI
- Sync Format / Polarity Preservation
- Compatible with Line Level Stereo Audio Signals
- Works with all Smart-AVI matrixes

RS-232+IR
OVER CAT5

The XT-Wall is a two-gang wall plate that extends WUXGA video, stereo audio, RS-232 and IR signals up to 1,000 feet over a single CAT5 STP cable. The wall plate design is perfect for adding the finishing touch to any professional or home A/V installation.

- Wall plate design for custom integrated look
- Choose from a variety of colors and styles
- Supports dual screens on receiver
- Supports high resolution video up to 1920x1200
- HD compatible (720p, 1080i, 1080p)
- Compatible with Line Level Stereo Audio Signals
- IR command single or multiple displays
- Compatible with VGA, XGA, Sun, MAC and SGI

HDX-AV HDTV Component Video and Stereo Audio Extender over CAT5

HDX-AV a high-resolution HDTV and stereo audio extender component within SmartAVI's HDControl product family geared specifically toward home theater owners and designers. Using small transmitter and receiver units, you can broadcast HD video and stereo audio signals over unshielded twisted pair(UTP) cabling. The HDX-AV is the perfect solution for home theater systems in which the video source is a great distance from the TV.

- Supports high-resolution component video up to 1920x1200
- HDTV compatible (720p, 1080i, 1080p)
- Supports Component Video (YPbPr)
- Fast 300 MHz Bandwidth support for high-resolution signals
- Compatible with line level stereo audio signals
- Designated trimmer in the remote unit to compensate for cable length

AR-100 RS-232 and Stereo Audio Extender over CAT5

The AR-100 extends RS-232 and stereo audio up to 3,000 feet over a single CAT5 STP cable. The best solution for the control of RS-232 compliant devices combined with stereo audio. Ideal for controlling and monitoring secure entry systems suited for apartment and gated community applications as well as office buildings and industrial sites that have a separate access control system.

- Supports the full 9-pin RS-232 standard
- Hi-fidelity audio frequency response
- Supports all protocol and baud rates
- Compatible with line level stereo audio signals
- Built-in lightning, power surge and transient protection
- Remote units come with buffered outputs
- Fully transparent path for all protocols and data transfers.

RK-XTPRO 16-Source High-Resolution WUXGA, Stereo Audio, RS-232 and IR Extender

The Rack-XTPro extends up to 16 sources of high-resolution WUXGA, stereo audio, RS-232 and IR signals over CAT5 STP cable up to 1,000 ft. Rather than buy multiple extenders for your rack components with numerous power supplies, the Rack-XTPro allows for up to 16 inputs and 16 outputs with only one power supply.

- Multi-display HDTV Compatible(720p, 1080i, 1080p)
- Supports High-Resolution WUXGA Video up to 1920x1200
- WUXGA output up to 30 ft. without amplification
- RS-232, IR communication allows command of compliant devices
- Fast 300 MHz Bandwidth support for high-resolution signals
- Built-In Power Surge and Voltage Transient Protection
- High Ground-loop Immunity eliminates line noise
- Compatible With Line Level Stereo Audio Signals

VSA-100 Smart Video Skew Adjuster

A/V
SKEW
ADJUSTER

The VSA-100 is Smart Adjuster that allows skew compensation between any Red, Green Blue signals. Any CAT5 or CAT6 introduce delay line between the pairs, due to the electrical lengths on each pair. The VSA-100 is perfect for compensating for the skew introduced by a typical CAT5

- Aligns the RGB of any analog video signal
- Each color can be adjusted individually
- Supports UXVGA and Y-Pb-Pr
- 0.62 ns total delay
- 2 ns delay step increments
- Digitally saves settings and remembers last state
- Compatible with most of the SmartAVI extenders

| Model | Description |

DVX-100 DVI-D Extender/Repeater

The DVX-100 extends the distance between any computer supporting DVI-D and monitors or projectors up to 50 feet. It features daisy chain capabilities that can extend the limit up to 100ft.

- Supports MAC and PC DVI-D
- Resolution up to 1920 x 1200 @60Hz
- Zero Pixel Loss
- Maintains highest DVI single link video resolution
- DVI output regenerates TMDS digital video
- Output can drive long cable up to 50 feet unless daisy chained
- User Selectable: DCC Information MAC or PC

DVX-PLUS DVI-D and USB Extender over STP

The DVX-PLUS extends Universal Serial Bus (USB) and high-resolution DVI-D video via a single STP cable. It allows 4 USB devices and one DVI-D display to be located up to 275 feet from the computer. Fully compliant with the USB specification, the extender provides a transparent path for both 1.5 and 12 Mbps data.

- Extends USB and DVI signals up to 275ft from the computer
- Uses easy to install, inexpensive twisted pair cable
- Supports 1920x1200 digital video resolution
- Fully compliant with USB 1.1 specifications
- Supports 1.5 and 12 Mbps data rates
- Compatible with all operating systems
- Fully transparent (does not use any emulation)

DVX-PRX Active DVI Learner and Programmer for EDID

DVI
LEARNER
PROGRAMMER

The DVX-PRX is an active DVI Learner Programmer for EDID. It can program and emulate any DVI-D. When connected to a computer the video signal passes through the unit; however the EDID (plug-and-play information) is emulated and not passed through the device.

- Supports Mac and PC
- Program devices for MAC and PC
- External power supply
- EDID stores in Flash
- Perfect solutions for DVI extenders and switches
- DVI Female connector
- LED for programing status
- Solves Booting issues in servers equipped with DVI-D

SX-200 WUXGA Video, Stereo Audio, Keyboard and Mouse KVM Extender over UTP

The SX-200 extends WUXGA video, stereo audio, keyboard and mouse signals up to 500 feet via a single CAT5 UTP cable. Control a computer from a remote location. Perfect for situations in which the computer must be stored in a secure location.

- Uses single CAT5 UTP cable to reduce installation costs
- Extends signal to a maximum distance of 500 feet
- Supports all PC/AT and PS/2 keyboards with full emulation
- Caps Lock, Num Lock, and Scroll Lock are automatically saved and restored.
- Supports full emulation and conversion on all PC/AT and PS/2 mice
- Compatible with Windows, NT, OS/2, UNIX, Linux, and other operating systems

| SX-200S | Video/Audio/PS2 CAT5 Extender. Includes: [SX-TX200, SX-RX200, (CCKVMMM06), & 2 X (PS5VD1A)] |

SX-500 WUXGA Video, Stereo Audio, RS-232, Keyboard and Mouse KVM Extender over UTP

The SX-500 extends WUXGA video, stereo audio, RS-232, keyboard and mouse signals up to 1,000 feet via a single CAT5 UTP cable. Control a computer from a remote location. Perfect for situations in which the computer must be stored in a secure location.

- Uses single CAT5 UTP cable to reduce installation costs
- Extends signal to a maximum distance of 1,000 feet
- Supports all PC/AT and PS/2 keyboards with full emulation
- Caps Lock, Num Lock, and Scroll Lock are automatically saved and restored.
- Supports full emulation and conversion on all PC/AT and PS/2 mice
- Supports RS-232 from 300bps up to 19,200 bps
- Compatible with Windows, NT, OS/2, UNIX, Linux, and other operating systems

UX-PRO WUXGA, Stereo Audio, RS-232/IR and USB 1.1 KVM Extender over CAT5

A/V
+RS-232, IR
USB
OVER UTP

UX-PRO is a high-resolution UXGA and stereo audio extender system(transmitter and receiver) designed to broadcast desktop video, stereo audio signals, IR, RS-232 and USB1.1 up to 275 ft over CAT5 UTP cabling. With RS-232 communication support the UX-PRO allows users to send commands to a single or multiple devices.

- Uses flexible, inexpensive CAT-5/5e/6/7/8 UTP
- Supports dual screens
- Supports high resolution video up to 1920x1200
- HDTV compatible (720p, 1080i, 1080p)
- IR from one source to 2 locations
- Compatible with VGA, XGA, Sun, MAC and SGI
- 4-port USB hub with the RX(receiver) unit

| UX-200S | Video/Audio/USB keyboard, mouse CAT5 Extender. Includes: [UX-TX200, UX-RX200, & 2 X (PS5VD1A)] |

USBXpress USB Extender over CAT5

USB-Xpress extends Universal Serial Bus (USB) via a single CAT5 cable. Using a unique method of transparent data transfer, the system allows a USB peripheral to be located up to 150 feet from the CPU. Fully compliant with the USB specification, the extender provides a transparent path for both 1.5 and 12 Mbps data.

- Extends USB port up to 100 feet from the computer
- Uses easy to install, inexpensive CAT5
- Fully compliant with USB 1.1 specifications
- Supports 1.5 and 12 Mbps data rate
- Uses a single CAT5 UTP cable between transmitter and receiver
- Fully transparent (does not use any emulation)
- STP-CAT6 for best performance
- Bus powered transmitter unit
- Supports MAC, PC and SUN
- Compact size
- Plug and play

USB-100 USB 1.1 Extender over STP

SmartAVI's USB-100 extends standard USB (Universal Serial Bus) 1.1 signals up to 220 feet away from your CPU using a single CAT5 un-shielded twisted pair cable. The USB-100 is capable of transparent data transfers at 1.5 and 12 Mbps.

- Uses Cost-Effective CAT5, better performance with STP
- Extends USB 1.1 up to 220 Feet From CPU with STP
- USB 1.1 Compliant
- Supports 1.5 and 12 Mbps
- Bus-Powered Transmitter Unit
- External Power Adapter for Receiver Unit
- Mountable Metal Casing
- Supports PC and Mac
- Fully Transparent(No Emulation Used)
- Plug-and-Play

USB2Pro USB 2.0 Extender with 4-Port Hub

SmartAVI's USB2Pro extends standard USB (Universal Serial Bus) 2.0 signals up to 325 feet using a single CAT5 cable. The USB2Pro supports all USB 2.0 high-speed devices, from keyboards to digital cameras and will operate on Windows®, Mac and Linux® operating systems. An integrated four-port hub allows for multiple devices to be connected at once.

- Supports USB 2.0 and 1.1 Devices
- Works on Windows, Mac and Linux Operating Systems
- Integrated Four-Port Hub
- Bus-Powered Local Unit
- Power Adaptor for Remote Unit
- Plug-and-Play

| Model | Description |

| USB2PROS | USB 2.0 Extender Link. Includes: [USB-2KTX, USB-2KRX and PS5DV3A] |

RK-USB2PRO 16-Port USB 2.0 Rack Extender over CAT5

The RK-USB2Pro extends sixteen USB 2.0 input devices to sixteen USB2Pro receivers up to 325 feet over CAT5 cable. It supports all USB 2.0 high-speed devices, from keyboards to digital cameras and will operate on Windows®, Mac and Linux® operating systems.

The USB2Pro receivers have an integrated four-port hub that allows for multiple devices to be connected at once. This means the RK-USB2Pro can extend sixteen USB 2.0 inputs to 64 outputs. Additional USB hubs can be added, increasing the amount of devices that can be plugged into the USB2Pro.

- Supports USB 2.0 and 1.1 Devices
- Works on Windows®, Mac and Linux® Operating Systems
- Receiver has an Integrated Four-Port Hub
- Rack Mountable (2U) with Internal Power Supply
- Extends up to 325 feet
- Plug-and-Play

HDS2P 1:2 HDMI Splitter

Using SmartAVI's HDMI 1 x 2 Splitter, it is possible to connect one HDMI/HDTV component to up to two display screens. Transmit a high-definition source such as Blu-ray player, gaming console, computer or cable receiver easily while viewing on two HDTV monitors. This is perfect for lounges, hotel check-in areas, restaurants, retail locations or even civic centers.

- HDMI 1.3c and DVI 1.0 compliant
- HDCP 1.2 compliant
- Wide Frequency Range: 25MHz~225MHz
- Video bandwidth: 6.7GBPS
- Resolution up to 1080p or WUXGA
- Supports CEC (not bypassing)
- Supports Dolby Digital, DTS-HD and Dolby True HD audio
- Easy installation

OVER STP

The HDX-4000 Extends four HDMI signals with Infrared up to 150 Feet to Display Monitors Using Dual HDMI-to-CAT6 STP Cabling while Retaining High-Definition Images at 480p, 720p, 1080i or 1080p. HDX-4000 is an innovative solution to extending any HDMI with optional infrared signal – be it a gaming console, Blu-ray player, etc. – over inexpensive CAT6 STP cabling up to 150 feet away to one to four remote displays.

- Compact Transmitter/Receiver Units
- Supports HDMI with Optional Bi-directional Infrared Signal
- Transmit Embedded Audio Signals
- Perfect Image Quality at all Resolutions (480p, 720i, 720p, 1080i, 1080p)
- Transmits HDMI 1080p/60 up to 150 Feet and 1080p/24 up to 280 Feet via Dual CAT6 STP Cabling
- Bandwidth to 1.65Gps
- Automatic DDC Learning from Local Monitor
- Supports Bi-directional Infrared

SuperMatrix MX 16-Port WUXGA Video, Stereo Audio, IR and RS-232 Matrix over CAT5

16-PORT
A/V
+IR, RS-232
OVER CAT5

SuperMatrix MX combines all the functions of an audio matrix, video matrix, IR matrix and a full RS-232 matrix into one 16-port matrix. This gives you absolute control over all of your audio/video and display devices over distances up to 1,699 feet over CAT5 cabling. SuperMatrix MX is Dolby 5.1 compatible and supports analogue High-Definition Television (HDTV).

Route up to 16 UXGA video and stereo audio sources to 64 Remote monitors and speakers using our XT receivers and CAT5 cable. You can also route additional sound sources to external amplifiers independently. This is useful if you want to add additional sound sources such as background music or security features. The full duplex Infrared and RS-232 feature gives you full control of both the matrix and all connected displays and devices.

Features

- Switches 16 inputs to any 16 outputs for unmatched design flexibility
- SuperMatrix is a full non-blocking switching matrix
- Integrated RS-232 and Infrared matrix
- Switch signals from devices located up to 1,699 feet apart
- HD compatible (720p, 1080i, 1080p)
- Supports high resolution video up to 1920x1200
- Compatible with Video Composite, S-Video, Component and VGA
- Provides access to 16 computers from 16 workstations
- Allows for remote control of devices through an Infrared connection

RS-232 Compliant

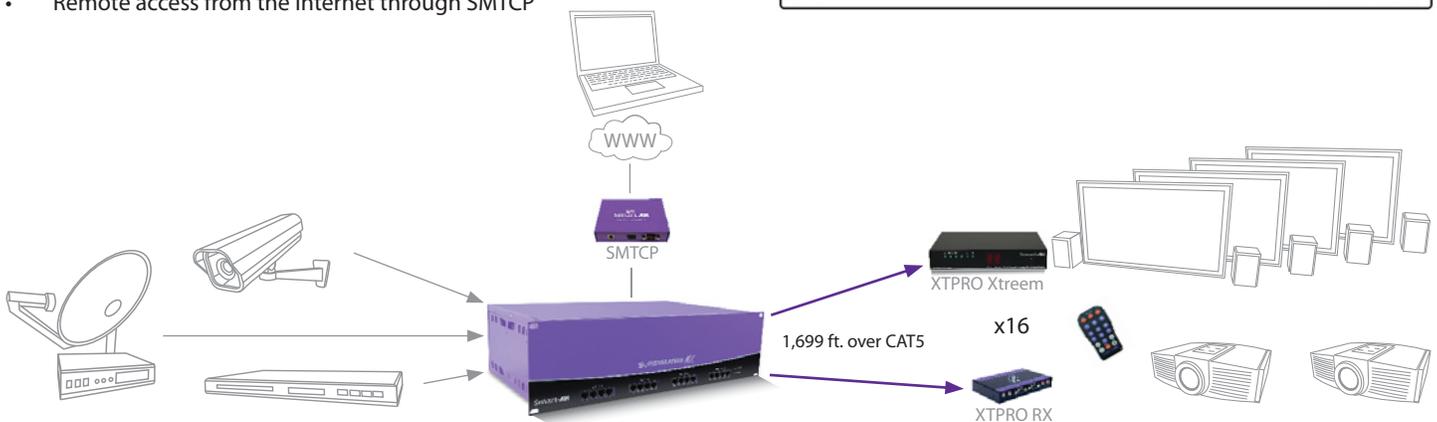

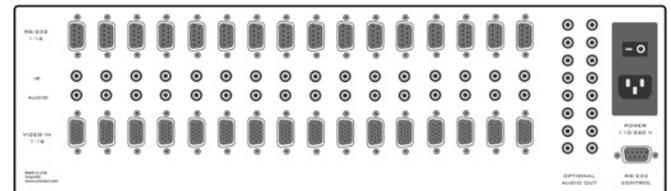

- Control of all the functions of the Matrix
- Multiple control interfaces
- Remote power control of all connected display devices
- Commands such as video schedules or input source
- Report activity
- Enable touch-screen displays to send and receive data
- Interrupt displays with Alerts and urgent messages
- Remote access from the internet through SMTCP

Applications

You can find SuperMatrix installed anywhere the distribution of multiple video formats throughout large areas is needed. Places like hotels, command centers, boardrooms, educational environments, entertainment facilities even high definition home integration.

- Video Walls
- Audio Visual Presentations
- Digital Signage
- Shopping Centers
- Airports
- Security
- Dealer Rooms
- Point of Sale
- Control Room

DVR16X16Pro 16-port DVI-D Matrix Switch/Extender over STP with IR and RS-232 Control

The DVR16X16Pro non-blocking digital video matrix switch is capable of switching and extending between 16 DVI-D sources and 16 displays up to 200 feet away over CAT6 STP. It can be controlled directly or remotely, using RS-232 commands, IR, USB or TCP/IP. This matrix is controlled by Windows®-based software that is simple to use – a cornerstone of all SmartAVI products.

- Multiple EDID Support
- 16 x 16 non-blocking, single-link DVI-D matrix switch
- Extender over CAT6 STP up to 200 feet
- Supports resolutions up to 1920 x 1200
- Control from either front panel or RS-232
- Available IR remote
- USB Control Available
- Ethernet control available
- Easy-to-use Windows based software

FVX-2000 WUXGA Video, Keyboard and Mouse KVM Extender over Fiber Optic

The FVX-2000 is a professional quality KVM that consists of a transmitter and receiver to extend Keyboard, Mouse and XGA signals up to 1,400 feet over a single multimode fiber optic cable. Fiber optic cable is capable of transmitting over very long distances with no signal loss and is immune to electromagnetic interference.

- Dual Access/Local Keyboard and Mouse
- Top Signal Quality over Multimode Fiber (1,400 ft.)
- Video Resolutions up to 1600 x 1200
- Customizable/Programmable DDC Table
- Supports WUXGA
- Supports all PC/AT and PS/2 Keyboards and Mice
- Fiber Plug Type SC
- Compatible With all Operating Systems
- Compatible With all Major KVM Switches

SignagePro Accessing the Power of a Digital Signage Network has Never Been Easier

How can your business benefit from a digital signage network?

- Increase sales with enhanced point-of-sale promotions
- Educate your customers with product demonstrations
- Enhance employee training and communication
- Offer information and directions for large buildings and campuses
- Generate revenue from third party advertising
- Offer live news and data streams

SignagePro makes creating your own digital signage network easy:

Easy to own

SignagePro is one of the most cost effective products of its kind on the market. But don't let the low price fool you. SignagePro has all the features, dependability, and scalability of products costing several times as much.

Easy to set up

From start to finish, you'll be creating your own presentations in about an hour. Even the most non-technical users can follow our easy-to-use, step-by-step, illustrated instructions. If you do run into problems, we have fully trained support staff on hand to guide you.

Easy to use

We developed SignagePro to be used by everyone, not just the IT department. Our intuitive Windows-based interface will get you building your digital content like a professional in no time.

720p

SUPPORTED FORMATS

- PowerPoint
- MPEG/AVI
- JPEG/GIF
- HTML
- Quicktime
- Flash
- RSS News Feeds

APPLICATIONS

The possibilities of Digital Signage are enormous. You need a solution that will get your message out quickly and easily.

The complete solution.

The SignagePro digital signage solution is a unique combination of hardware and software that allows a single PC to manage and control multiple remote display devices, simultaneously and independently, from a central location. Each remote display is capable of running a variety of rich media and applications uniquely suited for that specific location. For example, one screen could be running a PowerPoint presentation about washing machines, a second screen in a different location could be presenting a video about power tools and a third screen could be displaying the results of a database search, while all screens are exhibiting real-time news briefs and updates at the same time. The SignagePro software is compatible with all industry standard file formats, such as Flash files, Video, HTML, QuickTime, Microsoft Office, and JPG.

How Does SignagePro Work?

SignagePro is a comprehensive client-server solution. It is comprised of software that allows the central host (the main PC) to manage and control multiple remote client stations (displays) located anywhere in the world. The Signage-Pro system offers remote-client hardware and software solutions as well. The operating system is easily updated by downloading it to the main PC and copying it over the thin client devices. The system supports frequent and automatic updates from the main server, and runs all applications sent by the central server.

Take control of your digital signage network.

SignagePro Mobility Mobile Digital Signage Network Solution

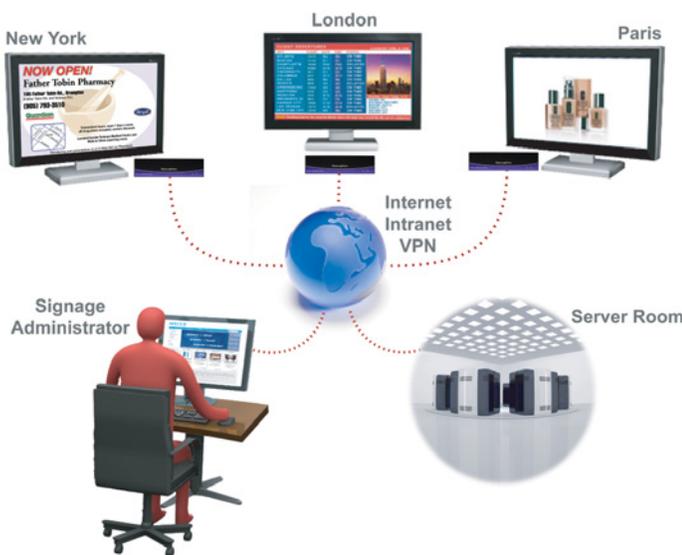

SignagePro Mobility gives you the power of SmartAVI's powerful digital signage solution in a lightweight, more compact unit than ever, allowing for easy implementation in compact spaces such as airplanes, busses, trains and other forms of public transportation.

Capable of being updated at any time from a local computer via wireless network, SignagePro Mobility has been designed to be the digital signage solution for public transportation systems integrators – as well as anyone that may be short on space but big on ideas and the need to communicate to an audience on the go.

Lightweight, compact and featuring a DVI output so that it can be used with high-resolution display screens, SignagePro Mobility is the dynamic solution for getting your message in front of customers/patrons in settings where traditional digital signage hardware has been challenging and difficult – if not impossible. Until now.

FEATURES

- Compact, Lightweight Design
- Designed for Mobile Digital Signage Screens
- Supports Common Media Files Including QuickTime, JPG, GIF, AVI, MPEG, Flash, PowerPoint and MP3
- Easy-to-Use Windows- Based Control Software
- 30 Optional Screen Layout Templates
- Powerful Multi-Zone Capability
- Supports RSS Feeds
- External Power Supply
- Wireless Configuration/Control

- Trains
- Elevators
- Theme Park Attraction Ride Vehicles
- Retail Kiosks/Temporary Points of Sale
- Small or Temporary Digital Signage Locations

The possibilities of Digital Signage are enormous. You need a solution that will get your message out quickly and easily.

The beauty of SmartAVI's SignagePro Mobility is that it's been specifically developed for digital signage that is on the go – especially for transportation mediums such as busses, trains, taxis and jumbo jets with a "captive audience" of commuters and travelers.

A great example of SignagePro Mobility's technology would be used in a fleet of commuter busses in Los Angeles. Each morning, before they leave the station, brand new digital content could be uploaded to the vehicles via wireless network installed at the main station. That information could be changed daily (or as often as the busses came through the station) and played in a continuous loop for riders.

Of course, SignagePro Mobility also has the capability of being updated on-the-fly via Internet connection so that each unit can be remotely updated while on the move, wherever they happen to be. That simply depends on the type of updating the system coordinator or administrator feels the busses need each day and then the hardware can be programmed accordingly.

SignWare Accessing the Power of a Mobile Digital Signage Network has Never been Easier

Deliver your message to audiences around the world with SignWare, an integrated signage management solution that is powerful and easy-to-use. SignWare makes signage simple at a very attractive price. The Signware digital signage solution is compact and can be installed in small spaces. Display video, images and RSS information with SignWare software. Several file types are supported including AVI, WMV, GIF and JPG. SignWare transmits high-quality 720p HD video combined with stereo audio.

SignWare uses the power of the internet to deliver content anywhere in the world.

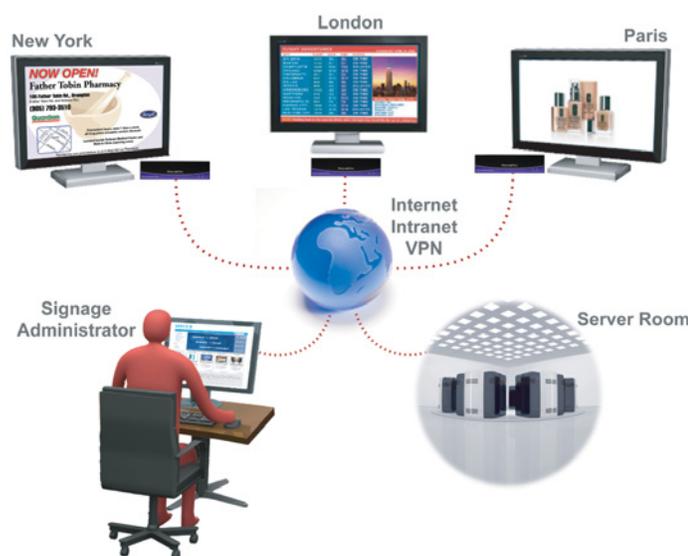

Connect your display directly to the network or via the Internet. Once the content has been delivered, the Internet connection is no longer needed unless you are using live feeds.

Manage multiple SignWare devices through a central server

- Once connected to the display monitor, the client only needs an Internet connection for updating or you choose to have a live RSS feed as part of your presentation.
- The client is programmed and initiated from your own PC, be it a laptop or desktop computer in your home or office. One PC – we'll call it the "server" – can operate as many digital signage clients as you need at once, be it one or more than a thousand.

Keep track of all your Digital Signage delivery

- See what is currently being played across the network.
- Create reports for a history of what has been played.
- Export reports in plain text or Microsoft Excel format.

How can your business benefit from a digital signage network?

- Increase sales with enhanced point-of-sale promotions
- Educate your customers with product demonstrations
- Enhance employee training and communication
- Offer information and directions for large buildings and campuses

SignagePro makes creating your own digital signage network easy:

Easy to own

SignWare is one of the most cost effective products of its kind on the market. But don't let the low price fool you. SignagePro has all the features, dependability, and scalability of products costing several times as much.

Easy to set up

From start to finish, you'll be creating your own presentations in about an hour. Even the most non-technical users can follow our easy-to-use, step-by-step, illustrated instructions. If you do run into problems, we have fully trained support staff on hand to guide you.

Easy to use

We developed SignWare to be used by everyone, not just the IT department. Our intuitive Windows-based interface will get you building your digital content like a professional in no time.

SIGNAGE & VIDEO WALL

ACCESSORIES

Wall System 4 to 16 Displays for Use with PresenterWall, SmartAVI's Point-and-click Software

With PresenterWall's sophisticated, yet user-friendly technology at your fingertips, you can now place numerous images or a large high-resolution single image on multiple screens to create a dynamic presentation that will target your customers or dramatically enhance any area where PresenterWall is showcased. PresenterWall's software allows full creative flexibility that allows for dynamic window sizing and positioning, smooth zooming within images, custom borders, titling, programmable presets, backgrounds, logo templates, optional digital time display and on-screen cursor control. SmartAVI's PresenterWall is priced aggressively against other video wall systems that cannot approach its creative adaptability, simple operation and commanding performance.

Easy Implementation

SmartAVI's PresenterWall has been designed with the common user in mind. We understand that you want a product that is simple to understand and easy to implement right out of the box without headache or frustration. Our programmers have taken great care to create software that allows even novice users to have PresenterWall up and running in minutes, achieving high-end results in just a short amount of time. Less hassle and more creative excitement is what you should expect as a SmartAVI customer. Once familiar with the PresenterWall software, you can begin experimenting and creating more complex presentations – complex in appearance, that is. Our user-friendly software makes "complicated" productions as simple as point... and click!

You will find PresenterWall's ability to read everyday files from your computer, such as Flash, Power-Point, JPEGs and QuickTime extremely helpful; there is no file conversion necessary. In addition to understanding a vast amount of file types, PresenterWall also is equipped to stream from DVDs or live cameras, creating a virtually limitless palette from which to create dynamic presentations.

Simple Software

Whether you have four or 12 video screens to use with PresenterWall, set up is made easy with SmartAVI's point-and-click software. End users have the ability to set up each monitor individually (such as resolution and color quality) and then can "add" them to the PresenterWall system.

For greater flexibility and simplicity, you can also define your video wall configuration within the software, such as 2x2, 2x5, 4x3, 3x4, 6x2, etc. and with one click, set all of the monitors in the group at the same time. This enables the software to communicate with each monitor separately or as part of a larger grouping for stretched/tiled images and video.

Ease of use, adaptability of the PresenterWall system and broad range of files that end users will likely use for content have been the main focus of SmartAVI in the development of this system. We understand that you want to hit the ground running with PresenterWall, not spend hours trying to decipher a dense manual or struggle with unfriendly software. At SmartAVI, we get it and understand that the key to your vision's success depends on the flexibility and overall simplicity of PresenterWall.

COMPLETE SYSTEM

APPLICATIONS

- Command Centers
- Simulation Systems
- Convention Facilities
- Information Displays
- Communication Hubs

Xpander Xpress Octal Display Graphics Card Based on ATI's Radeon™ X1650 Series

The SmartAVI Xpander Xpress octal display card is based on ATI's Radeon™ X1650 Series. The Xpander Xpress is the ideal solution for video wall multimedia running XVGA or DVI in eye-catching 32-bit truecolor, for desktop and DVD playback. Xpander Xpress is capable of supporting up to 8 displays per port. SmartAVI's PresenterWall software makes the XP4-Xpress the solution to your video wall needs. Affordable and ideal for large video wall requirement, Xpander Xpress supports 4 x 4 and larger applications with video overlay options.

Your system will be able to handle the latest video, Adobe Flash, Microsoft® PowerPoint, and high-definition digital images. Based on Radeon™ X1650, Xpander Xpress is capable of displaying a billion colors more than competing graphics processors, boasts one of the highest video performance scores in the industry, and can bring today's video wall systems to life with outstanding shader performance and simultaneous high dynamic range lighting and full-screen anti-aliasing, available only with ATI products.

SPECIFICATIONS

- CE and FCC certification
- RoHS and WEEE compliant
- PCI Express x16 bus interface
- Max. VGA resolution 1920 x 1200 per port
- Maximum pixel frequency per port is 400MHz
- Support MPEG1/2/4 decode and encode acceleration
- Max. DVI resolution 1920 x 1200 (165 MHz BW) per port
- Up to 128-bit memory interface using GDDR3 SDRAM to build 256 MB per GPU
- Support for DirectX 9.0 in hardware and complete feature set supported in OpenGL 2.0
- DVI-D and VGA outputs are driven through VHDCI-68 connectors with adapting cables
- Using a versatile PCI-E Switch to share just a single PCI-E slot by multiple native PCI-E GPUs

VPorter Video Capture PCI Plug-in Card for Use with Xpander Card and Software

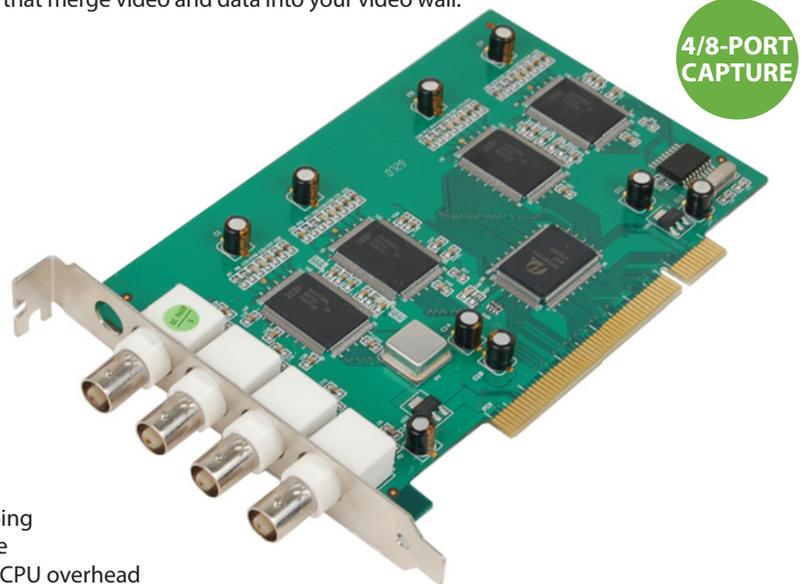

The Vporter is a video capture PCI plug-in card which has been designed to operate in conjunction with the Xpander card and software. The Vporter, when combined with the Xpander provides up to 8 separate video overlay windows. The Vporter enables you to bring 4 or 8 video sources such as cameras, dvd players and satellite receivers to your videowall. The VPorter can be positioned and sized anywhere in the videowall. Together with Xpander, the VPorter offers the complete solution for videowalls that merge video and data into your video wall.

APPLICATIONS

- Control Rooms
- Command Centers
- Communication Hubs
- Convention Facilities
- Network Operations Centers

FEATURES

- 4 or 8 Ports
- WindowsXP support
- Multiple Vporter cards supported
- Multi-standard video support, PAL, NTSC, SECAM
- Multi-screen support, no position or size restrictions
- Separate controls for brightness, contrast, color and cropping
- Fully controllable using the Presenter Wall control software
- Video overlay windows are updated in real time with zero CPU overhead

| Model | Description |

| AP-VP04/8 | 4/8 Port PCI Video Capture Card |

V-Grabber Capture any WUXGA Screen and Display it on your Windows® Desktop.

SmartAVI's V-Grabber is a Dynamic, Powerful PCI Card Functioning as a High-Resolution 1600 x 1200 UXGA/RGB Frame Grabber. V-Grabber is capable of displaying all RGB/VGA sources on a desktop or display screen at resolutions up to 1600X1200. The card comes equipped with user-friendly software for configuring the timing and formatting of the input sources and how your desktop monitor will display the captured data.

APPLICATIONS

- Command Center Operations
- Theme Park/Attraction Integration
- Control Rooms
- Command Centers
- Communication Hubs
- Convention Facilities
- Network Operations Centers

FEATURES

- Captures up to 1600x1200 Resolution
- Multi-Sync Mode Detection
- Equipped with User-Friendly Playback Software
- Windows XP and Vista Support
- Auto-Detect VESA and HDTV Modes
- Data Transfer Speed up to 110 MBytes/s
- DMA Transfers Data Across PCI Bus Without Using Host CPU Cycles

StretcherPro Stretch Any DVI-D Source Across Four DVI or VGA Displays

SmartAVI's StretcherPro is a digital signage / display wall controller that can take any DVI-D source and stretch it among four VGA or DVI displays. StretcherPro supports the highest resolution available (1920 x 1200) on the market for single link DVI-D. Each of the four screens displays 1/4 of the image in a 2 x 2 format, using real-time scaling.

- 2 x 2 VGA Digital Signage / Display Wall Controller
- Supports DVI-D Input
- Supports Multiple DDC Tables
- Resolutions up to 1920 x 1200
- Outputs to Four Screens, Each Showing 1/4 of the VGA Image (2 x 2 Format)
- Supports Analog and DVI LCD Displays
- Stand-Alone Unit, No additional Software or Hardware Necessary
- Multiple Units can be Linked for Larger Wall Configuration

CVH-01 Video Components/VGA and Audio to HDMI Converter

VGA TO HDMI CONVERTER

If you've just invested in a large home theatre setup, you might now be thinking how you can hook up your PC to watch your large collection of media files on "the big screen". This converter box is the answer! It takes the VGA and stereo audio outputs from your PC, and converts them to now common HDMI format while maintaining full high-definition (HD) resolution. Mains adaptor included.

- Can convert analog video signals to digital HDMI signal
- Can be used as VGA to DVI converter
- Precise 10-bit A/D color conversion for best image quality
- Supports Plug-and-play function, no software installation required
- Supports high-definition output from multiple sources, such as DVD players, Satellite receivers, digital projectors, A/V receivers, and set up boxes
- Allows you to convert analog audio/video to digital format

SPLITTERS

RGB2VGA Digital RGB to DVI/VGA Converter

DIGITAL RGB TO DVI/VGA CONVERTER

Older equipment such as video players, imaging hardware and audio components typically output their signals as RGB (Red, Green, Blue and the synchronization signals HSYNC and VSYNC). These component signal frequencies are generally too "slow" for modern displays such as digital monitors and flat-screen displays. The RGB2VGA converter allows these older A/V components to work with modern displays with both DVI and VGA signals.

- Output Connection: Dual VGA 15-pin, Dual VGA 12-pin
- VGA Output Supported: VGA , SVGA, XGA, HDTV
- Input Signal Auto Scan: CGA , EGA, VGA
- Input Signal Auto Scan: YCbCr/YPbPr
- (480i, 576i, 720i, 1080i, 480P, 576p, 720p, 1080p)
- Selectable Input Connection: RGBS 5-pin, RGBHV 8-pin, VGA 15-pin, Component RGB - 3AV
- Supports Output Resolution Control, Position Control and Zoom Control
- Digital 24-bit A/D Converter for True 16.7-million Color Conversion
- Supports all VGA Monitors(CRT,LCD,PDP)
- Over 70 Pre-installed Video Modes for Rapid Syncing

SIGNAGE & VIDEO WALL

| Model | Description |
|----------|-----------------------------------------------------------------|
| RGB2VGAS | Digital RGB to DVI/VGA Converter (70 RGB formats Pre-installed) |

SMCVG2DVI VGA to DVI Active Converter

VGA TO DVI-D CONVERTER

The SMCVG2DVIS automatically detects the VGA input resolution and converts it to the new DVI (Digital Video Interface) video display format. If you've just invested in a large home theatre setup, you might be thinking how you can hook up your PC to watch your large collection of media files on "the big screen". This converter box is the answer! It takes the VGA output from your PC and converts it to the common DVI-D format while maintaining full high-definition (HD) resolution.

- Allows old system to connect to DVI display
- Converts analog video signals to digital DVI signal
- Highly precise 8-bit A/D conversion of each color channel, better image quality
- Ensures to send high-definition signal without signal loss
- Supports Plug-and-play function, no software installation required
- Front panel switches for better synchronization and tuning to the Display

| Model | Description |
|------------|---------------------------------------------------------------|
| SMCVG2DVIS | VGA to DVI active Converter . Includes: [CVG2DVI & (PS5VD1A)] |

SMCCV2DVI NTSC/PAL to VGA/DVI-D Scaler

NTSC/PAL TO VGA/DVI-D CONVERTER

The SMCCV2DVIS automatically detects the video input resolution and converts it to either VGA or the new DVI (Digital Video Interface) video display format.

- Specially designed to display video on VGA monitors, LCD color monitors
- Accepts NTSC or PAL Composite video inputs via BNC, and converts to VGA, and DVI-D output
- Supports NTSC, PAL video system
- Input video system 50 to 60Hz frame rate detection (NTSC/PAL)
- Multiple output mode enabled : 800 x 600, 1024 x 768, up to 1280*1024@60Hz
- Frequency output: 60Hz, 75Hz, 85Hz
- On screen display function: Contrast, Brightness, Color, Tint, Features, Resolution
- Built in ESD protection
- Built in video auto gain control for good quality picture

SMCYPB2VGA Component Video YPbPr to VGA Converter

YPbPr TO VGA CONVERTER

The SMCYPB2VGA automatically detects the YPbPr video input resolution and converts it to VGA. It also features a 2-port switch that allows one LCD monitor to share the output of a computer and a component video device such as a DVD player. Based on the input selected, the output will be either a decoded TV or buffered PC video signal. It is capable of handling SDTV, HDTV, XGA, SXGA, and UXGA (1900x1200) video formats. It supports components ranging from LCD monitors, to set-top boxes, to projectors.

- Front panel for selection
- Converts (YPbPr) signal to RGBHV (VGA) signal.
- Enable connection for PC and DVD
- Selection of source via front panel
- Supports digital and analog audio
- Video bandwidth: component video up to 70Mhz, RGBHV up to 400Mhz.
- Supports high definition video inputs 480i, 480P, 576i, 576p, 720P, 1080i and 1080p
- RGBHV input support hi resolution up to 1900 x 1200@60Hz.

ORDERING INFORMATION

Thank you for deciding to purchase our product(s).

You can order your product(s) in any one of the following ways:

CALL US at **800-487-2243** or **818-565-0011** between 8:30 a.m. and 5:00 p.m. PST.

Fax us at **818-565-0020** or Email to **info@SmartAVI.com** at any time.

Orders will be processed during normal working hours.

Please allow at least one day turn-around time for email processing.

Once your order is received, it will be confirmed by returned e-mail. The product availability and shipping schedule will be provided at that time.

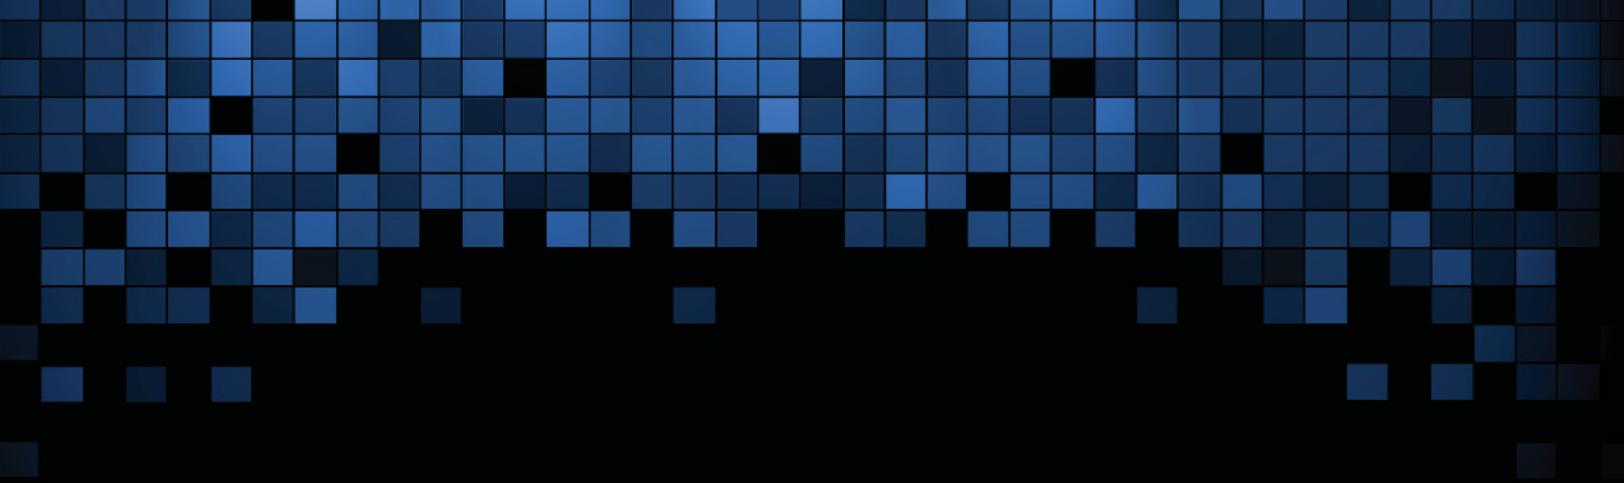

PAYMENT TERMS:

You can pay for your order(s) in any of the following ways:

- Credit cards - Visa, MasterCard.
- Credit terms- terms are established for qualified resellers based on approved credit and purchasing history.
- Certified checks, company checks (subject to prior approval).
- Wire transfer - for international customers.

SHIPPING:

Your order will be shipped to meet agreed delivery schedule via UPS. If you would like to use another carrier you would need to provide your own account number. Handling charges will be added based on the size of the order. All orders are F.O.B. Burbank, California.
